

Ex maintenance

<i>Objectives:</i>	This is a supplementary course for those doing maintenance work on Ex installations. The course contains both theory and practical exercises. It includes an introduction to what the authorities permit the user or owner of an electrical system to carry out themselves and what must be conducted by an authorised workshop. Having completed the course, participants will have the necessary knowledge to conduct maintenance work in a safe and professional manner.
<i>Intended for:</i>	Electricians and automation technicians. Participants must have some basic Ex knowledge.
<i>Contents:</i>	<ul style="list-style-type: none"> • Corrosion • Fighting corrosion • Maintenance • Overhaul • Repairs • Flameproof joints • Damaged flameproof joints • Overhauling and repairing Ex motors • Testing motor protection • Repairing Exi equipment • Excerpts from EXR-01 • Exercises
